January 27, 1994

Dear Peter,

I was going through my files and came across the radiographs of David and your correspondence. I think it would be best if I return these to you for safe keeping. I know that we have ~~at~~ least submitted the correct codes to be input into the NCIC computer bank; however I did request from both the BCA and Minnetonka PD a photocopy of the revised NCIC information on dental so that I could verify that it is INDEED entered correctly and I have not as yet heard back from them. Perhaps you could follow up on that and send me the new NCIC coding.

Thank you for writing. Those concerns regarding  
your brother brought to my attention and  
that of the BCA that we have a definite  
problem with getting correct dental information  
into the NCIC system. The BCA has  
already taken steps to further educate the  
officers and staff out in the field "as to how  
to get the job done properly.

If I can be of further help, please let  
me know.

Sincerely

John J. Anderson DDS
